

STEEL'S PREMIER TECHNOLOGY EVENT FOR 2012

7-10 May 2012 ♦ Georgia World Congress Center ♦ Atlanta, Ga., USA

AISTech 2012

The Iron & Steel Technology Conference and Exposition

On 7-10 May 2012, the global steel industry will gather in Atlanta for more than 400 technical presentations covering all phases of today's steel production. This major international event also includes plant tours, keynote presentations by today's business leaders, and North America's largest steel-related exposition where you can meet face-to-face with thousands of key decision makers.

Remain competitive in the global steel market by gaining command of cutting-edge innovations and discover dynamic solutions to everyday business challenges. Attendees have the chance to explore new technology, brainstorm about potential enhancements, and meet with vendors to help advance the global steel industry.

Visit AISTech.org for more information.

TECHNICAL TOPICS INCLUDE:

- ♦ Safety & Health
- ♦ Environmental
- ♦ Cokemaking
- ♦ Ironmaking
- ♦ Electric Steelmaking
- ♦ Oxygen Steelmaking
- ♦ Specialty Alloy & Foundry
- ♦ Ladle & Secondary Refining
- ♦ Continuous Casting
- ♦ Hot & Cold Sheet Rolling
- ♦ Galvanizing
- ♦ Tinplate & Electrogalvanizing
- ♦ Plate Rolling
- ♦ Rod & Bar Rolling
- ♦ Pipe & Tube
- ♦ Rolls
- ♦ Metallurgy of Steelmaking, Casting, Processing, Products & Applications
- ♦ Energy & Utilities
- ♦ Electrical Applications
- ♦ Computer Applications
- ♦ Project & Construction Management
- ♦ Maintenance & Reliability
- ♦ Lubrication & Hydraulics
- ♦ Refractory Systems
- ♦ Material Handling
- ♦ Cranes & Mill Buildings
- ♦ Packaging, Shipping & Transportation Methods
