

**WILLIAM P. HILL** is a native of Rehoboth Beach, Del. He received a bachelor of science degree in mathematical engineering from the University of Delaware in 1933 and had done post graduate work at Johns Hopkins University. He was employed by Bethlehem Steel Corp. at Sparrows Point in 1933 in the maintenance department, and held various positions in the maintenance, operating and engineering departments through chief engineer. In 1948 he was appointed assistant general manager of Sparrows Point and in 1953 was transferred to Bethlehem, Pa., to serve as assistant to the vice president—operations. He then left Bethlehem Steel in 1958 and was named vice president—engineering of National Steel Corp., the position he now holds.

*ASSOCIATION OF IRON AND STEEL ENGINEERS*

### **President's Message 1971**

The accelerated pace of technological change within our industry is creating a shortage of technically trained personnel.

Over the years, the AISE has been involved in sponsoring and promoting activities designed to update the knowledge of its members in both the engineering and operating areas. The continuation of this educational development is essential if our people are to meet the challenges and demands of the future.

The Association's monthly District Section meetings and the national conventions provide the opportunities for the sharing of experiences and the discussion of mutual problems. An added activity that might best be undertaken at the District Section level is the organizing of seminars on some phase of technology of particular concern to that Section. This could be approached as a joint venture, involving several District Sections.

It is also important that we continue our efforts to attract young engineers into the steel industry, and we encourage a greater participation in AISE activity among our Junior members. This can most effectively take place at the local level, where the younger members can be exposed to the many varied projects encompassed by the

District Section programs.

More than ever before, we must direct our energies toward the betterment of our industry. With your help, the officers and directors of the Association will work toward that end.

William P. Hill  
President, AISE
