

Please submit abstracts of 150 words or less at AIST.org under Conferences and Expositions, then Technology Training. Deadline for submission is 31 August 2019. Be sure to include the following information when submitting your abstract:

- Author(s), Company Affiliation(s) and Job Title(s)
- Contact Address: City, State/Province, Zip/Postal Code, Country
- Contact Telephone Number and Email Address
- Paper Title and Abstract (150 words or less)

**Abstract Acceptance notified by  
4 October 2019**

**Manuscript Due Date:  
10 January 2020**

**General information and  
registration details will be  
available at AIST.org.**

**FIRST ANNOUNCEMENT AND CALL FOR PAPERS**

# **SCRAP SUPPLEMENTS & ALTERNATIVE IRONMAKING 8**

**2-4 MARCH 2020 | ORLANDO, FLA., USA  
WYNDHAM LAKE BUENA VISTA**

The AIST Direct Reduced Iron Technology Committee is planning Scrap Supplements & Alternative Ironmaking 8, to be held in Orlando, Fla., USA.

These conferences are international in scope and participation, covering activity in research, process and project development, plant construction and start-up of direct reduction and alternative ironmaking processes, and are mainly aimed at supplying virgin iron units to feed the growth of electric furnace flat-rolled steel production worldwide. The 2020 conference will focus on the following areas: successful projects/processes, the challenges of struggling processes, processes still under development, new approaches, and the use of the reduced iron products.

The symposia began with a highly successful meeting in Myrtle Beach, S.C., in 1993, organized by the Process Technology Division Advanced Technology Committee of AIST's predecessor, the Iron & Steel Society. This meeting was followed by others in Myrtle Beach in 1996; Trinidad in 1999; and under AIST in Baltimore, Md., in 2004, 2008 and 2012; and most recently in Orlando in 2017.

To encourage candid discussion and to accommodate the most recent findings, written manuscripts are not required. Authors are encouraged to make their PowerPoint presentations available to attendees.
