

Environmental Solutions: Meeting EPA Air Emission Requirements

Conference Details:

25–27 October 2022, Orlando, Fla., USA

No. of Attendees: 55

Conference Highlights:

The content of the seminar was organized by topic, beginning with optimization of meltshop emissions capture, modeling, particulate collection and transport, baghouse operation, and filter media. Engineering, permitting and compliance were also discussed from regulatory, third-party, and steel producer points of view. Monitoring and testing procedures for internal audits, feasibility studies and stack tests were topics of focus on the second day. The final day focused on additional environmental systems, including scrubbers, fans, duct and related processes. The attendees toured Nucor Steel Florida Inc. facility.

1. Ray Tedford (left) presented a plaque of appreciation to Maggie Saylor (right) for hosting a tour of Nucor Steel Florida Inc. for attendees of the Environmental Solutions conference. 2. Adam Pace gave a presentation during the conference.
