

Calling all YOUNG PROFESSIONALS!

Looking to advance your career in the iron and steel industry?

Get involved in AIST.

We are your **steel network**.

As a global, non-profit organization with more than 15,500 members, AIST represents an incomparable network of steel industry knowledge and expertise. We focus on advancing the technical development, production, processing and application of iron and steel. We'd love for you to join our community!

Still on the fence? Join today and get a taste of what we're all about — your first year of membership is on us!*

Find your **niche...**

Member Chapters

AIST's 22 Member Chapters provide opportunities for members to meet locally, exchange ideas, network with peers and participate in leadership roles.

Activities include annual meetings, keynote presentations, roundtable discussions, plant tours, social activities and product fairs.

Technology Committees

AIST has nine unique Technology Divisions that address specific steelmaking process, engineering, equipment and reliability technologies. Within these divisions, 29 committees represent the essential technologies required for sustainable steelmaking.

Activities include plant tours, conference program development, roundtable discussions and technical presentations, and more.

"The advice that I would give to other Young Professionals in the steel industry is to get involved in AIST and build your network. Having that support and advice is really critical to your long-term success in the industry. Also, take advantage of opportunities that are available to expand your knowledge base through things like AISTech and Technology Training."

— Liz Hunter, Technical Service Supervisor, Nucor-JFE Steel Mexico

**The AIST Foundation will sponsor a Young Professional's first year of membership free if they are 30 years of age or younger. Individuals do not qualify if he/she is rejoining after suspended membership.*

Help Us
HELP YOU!

Join AIST Today and **Unleash the Opportunity!**

Network

Meet people with like-minded interests facing similar challenges, obstacles and successes as you. Join a Member Chapter, a Technology Committee or both! Put yourself in the driver's seat of your career journey and connect with steel industry peers that can help you get to the next level.

Knowledge

AIST hosts a wide variety of training programs throughout the year that address specific process, engineering, equipment and reliability technologies associated with the global iron and steel industry. No matter your skill level or position, there are opportunities for you to grow and learn.

Exposure

Get in front of steel industry leaders and take advantage of the opportunities to listen to their experiences and perspectives by attending international conferences like AISTech, MS&T, European Steel Forum and more.

Access

Get discounts on publications and access to the largest collection of iron and steel technology research. Conference proceedings, journal archives and industry data are all easily searchable and at your fingertips! Plus, you can download full issues of *Iron & Steel Technology*.

Visit **AIST.org/YoungProfessionals** for more information and to get involved today!
