FOR IMMEDIATE RELEASE

Allied Mineral Products Opens Third Manufacturing Facility in China

Allied Mineral Products recently celebrated the opening of its newest Chinese manufacturing facility in Jiujiang Town, Nanhai District of Foshan, Guangdong Province.

This new facility serves the South China market with a manufacturing capability of 110 million lbs of local product per year. As with each global location, this new facility produces high-quality refractory products to the same standards used at its headquarters in Columbus, Ohio, USA.

Since 1998, Allied has manufactured product in China with its first wholly-owned, international manufacturing location in Tianjin. Allied then expanded in Tianjin and Foshan. Today, Allied's Chinese operations are its largest and most self-sufficient global affiliates.

Allied Mineral Products is a leading global manufacturer of monolithic refractories and precast refractory shapes with 12 worldwide manufacturing facilities, five precast shapes facilities, and three research and technology centers. Headquartered in Columbus, Ohio, Allied serves a wide variety of industries with innovative refractory solutions and exceptional service and support, backed by expert engineering and research teams. Allied is proud to be an employee-owned company.
