AMI Automation launches new Tech Center.

Monterrey Mexico: AMI Automation has a new tech center for customers of our MeltShops Solutions. AMI Automation's tech center provides 24-7 EAF monitoring and support for customers that subscribe to our premium service packages to ensure their EAF is always running at its absolute peak performance. The new center complements our traditional on-site services and helps us collaborate with our customers to use our technology in ways that take their EAF to a new level of high performance and efficiency.

AMI has installed state of the art technology to provide remote monitoring, technical support, and training in the latest EAF optimizing tools including troubleshooting our systems and optimizing processes. AMI EAF optimization hardware and software is supported by the largest technical team in the world that is exclusively dedicated to EAF optimization. Our ATC is another important step in AMI's relentless passion to help our customers run the most efficient EAF's in the world. Customers using our EAF Optimization technology demand the best support possible. Technology only takes you so far- people make the difference.

Fernando Martinez – Vice President AMI Automation said: “We are excited to open the new AMI Tech Center and look forward to combining our 30+ years of experience with automation and controls including artificial intelligence to assist our customers with the challenges of implementing and upgrading to new technology solutions.”

With this new tech center AMI continues its focus on designing, manufacturing and implementing innovative technology solutions to provide process improvements that help make companies more efficient.

AMI Automation is an international automation and control solutions company. Industries we serve include Steel, Cement, Pulp and Paper, and Oil and Gas. AMI has over 30 years' experience automating industrial processes to make them run better. Our team of experienced, specialized engineers are available for consulting, custom design, training and technical support.

Contact AMI today for your automation and control solutions.
