

# YOU'RE GOING PLACES!

Material Advantage can help you achieve your academic goals and set you up for success in your professional engineering career.

## What Is Material Advantage?

Four memberships — one price! Material Advantage is a student program created for undergraduate and graduate students enrolled in materials science, engineering and other technical engineering programs at universities around the world. The US\$30\* membership fee provides access to four distinguished materials science and engineering professional societies: ACerS, AIST, ASM International and TMS.

## How Material Advantage Can Help?

### Networking

- *At conferences* — meet professionals that could become your connection to a job upon graduation. Attend the Materials Science & Technology Conference and Exhibition (MS&T) or individual conferences held by ACerS, AIST, ASM and TMS. Free or discounted registration is available to most events.
- *On campus* — meet with faculty and peers outside the classroom at student chapter events.
- *At meetings* — attend local events and immerse yourself in these invaluable opportunities to build professional relationships early in your career.

### Knowledge

- Research at your fingertips! FREE electronic access to technical publications and monthly articles from ACerS, AIST, ASM and TMS.
- Attend international conferences and listen to technical presentations from industry leaders in the field.

### Financial Support

- More than US\$800,000 in scholarships and grants are available every year through the partners and their foundations.
- Travel grants offered when attending association events.
- Contest opportunities for professional development and for added visibility and recognition.

### Career Landscape

- Internship and employment opportunity resources are offered by each partner organization.
- One FREE year of professional membership at each association following graduation!

**Don't wait — join Material Advantage and gain access to these valuable benefits today!**

\* Annual membership dues for students in regions of the world with certain economic trends, as defined by The World Bank, will be US\$15 per year.

"Joining MA gave me the opportunity to take on a leadership role in my local chapter and collaborate with a diverse group of students, faculty, and industry professionals. Through organizing activities for the OSU MA Chapter, I strengthened my interpersonal and professional skills, better preparing me for the challenges of graduate school and my early career."

— Nicole Hudak, The Ohio State University
